Blinds Direct

Activity, people & shot history

3	25	136
TIMELINES	SHOTS · INCLUDING HIDDEN	PRODUCTION EVENTS

This report covers 25 shots across 3 timelines, including 10 hidden shots. It follows task assignments, status changes and recorded conform/render updates.

21 tasks approved; 1 task awaiting approval.

Inside: producer overview · artist workboard · activity charts · shot records

Recorded activity: 21 Sep 2026 – 28 Oct 2026.

Generated 29 Oct 2026, 16:47 GMT.

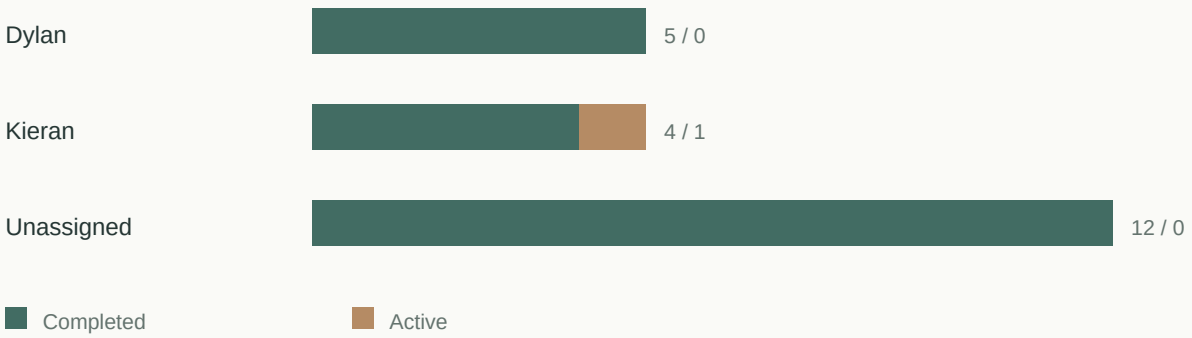

Producer overview

Who holds the work, what is complete, and what still needs attention.

All timelines · includes hidden shots and tasks. Counts may differ from the web overview with hidden items switched off.

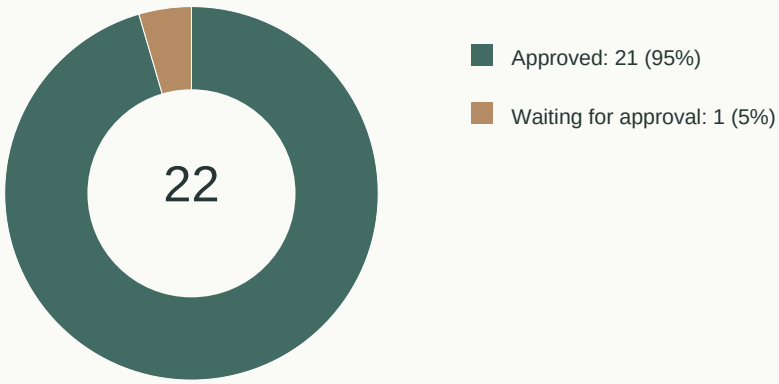

1 ACTIVE TASKS	21 COMPLETED	12 NO ASSIGNED ARTIST
0 IN PROGRESS	1 AWAITING APPROVAL	1 ACTIVE ARTISTS

Work by artist

Bars show current assigned tasks. Labels give completed / active counts; completed means Approved or Done.

Current task status

Tasks without an artist may already be approved. Assignment describes recorded responsibility, not proof of authorship.

Artist workboard

Current tasks grouped by artist, then by active or completed work. A shared shot appears under each assigned artist.

Activity overview

Charts count recorded changes, not working hours or effort. All timelines and hidden shots are included.

Production events by week

Where activity happened

Shots with the most recorded changes

Included: task creation/deletion, assignments, status changes, conform and render updates. Excluded from charts: notes, colour, duration, shot creation and visibility edits. A conform update is not necessarily a new render or client revision.

Production rhythm

Daily activity, approval milestones and the mix of recorded changes.

Production activity calendar

	Mon	Tue	Wed	Thu	Fri	Sat	Sun
21 Sep	19	0	7	7	0	0	0
28 Sep	0	17	14	27	27	0	0
05 Oct	12	0	0	6	–	–	–

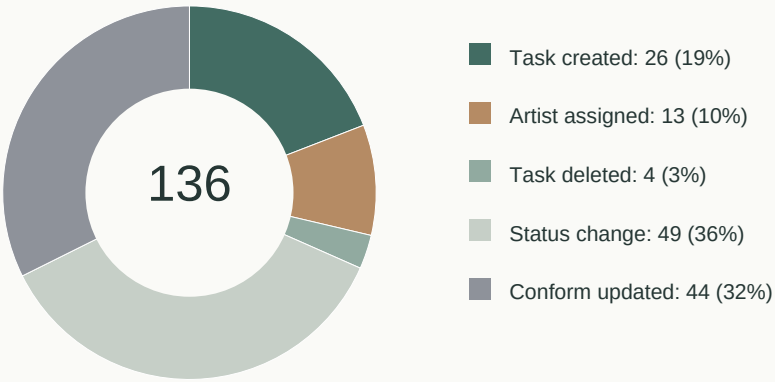

Cell values are event counts. Darker cells mean more recorded changes; zero means no logged production events.

Cumulative approval / completion events

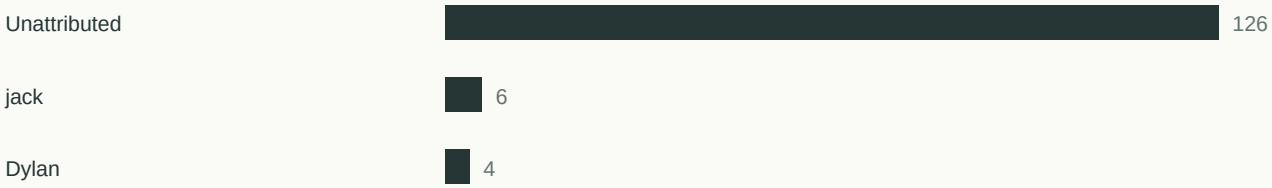

Historical transitions into Approved or Done, including repeated approvals and deleted tasks. This is not the count of currently completed tasks.

Production event mix

People & record quality

Recorded actions by author

Current task assignments

Artist	Assigned tasks	Approved / done
Dylan	5	5
Kieran	5	4
Unassigned	12	12

Approval record

21 tasks approved; 1 task awaiting approval.

Outstanding: blinds_160 — Match move (Kieran, waiting for approval)

23 recorded transitions into Approved or Done. These are historical events, including repeated approvals and tasks subsequently deleted.

How to read this report

206 of 230 total activity records have no recorded author. Assignment history names the assigned artist; it does not identify who performed an action. Neither chart is a productivity ranking.

Shot cards show current tasks and recorded historical assignments. Hidden tasks are labelled. Deleted tasks may still contribute activity but are absent from the current task list.

Activity spans run from the first to last recorded event on each shot and can include later administrative edits. They do not measure hours worked. No work-time estimates are made.

Task titles and notes are kept literal. Approval applies to individual tasks; a shot without tasks is not assumed approved. Latest conform filenames are recorded references, not verified delivery files.
